Professional Experience

Google | Bengaluru | April 2025 – Present

Software Engineer

- Designed and deployed a secure browser-based VM access platform enabling engineers to debug production infrastructure without direct SSH access.
- Architected a Go-based WebSocket relay service on Kubernetes bridging browser WSS traffic to TCP VNC servers for scalable remote console access.
- Developed an Angular + noVNC browser console interface replacing manual CLI workflows and improving operational accessibility by 100%.
- Engineered 18+ AI agent systems using Google ADK, FastAPI, and Vertex AI to automate NOC alert investigation pipelines, reducing manual triage by ~40%.
- Created Dev0, an AI-driven infrastructure orchestration platform integrating Terraform and CI/CD pipelines for automated infrastructure provisioning.
- Implemented Human-in-the-Loop safeguards preventing destructive infrastructure mutations in automated deployment workflows.
- Streamlined AI agent development across teams by creating comprehensive documentation for Google ADK and GCP deployment, enabling engineers to onboard 50% faster and reducing errors by 15%.

Clear (formerly ClearTax) | Bengaluru | July 2024 – March 2025

Software Developer

- Developed the Tax Savings Deductions module using React, Tailwind, and TypeScript with structured financial input validation.
- Increased product engagement by 30% and reduced incorrect tax submissions by 40% through improved financial input validation workflows.
- Spearheaded a comprehensive rewrite of the Loans Summary module using React and TypeScript, enabling adaptive display of tax deduction categories and reducing page load time by 50%.
- Implemented real-time updates, edit/remove workflows, and incremental form architecture.
- Optimized frontend rendering pipelines, improving interaction speed by 40%.

Skills

Languages: Python, TypeScript, Go, Java, JavaScript, SQL, HTML/CSS

AI & Machine Learning: Generative AI Agents, RAG, Google ADK, Vertex AI (Gemini), Vector Search, Prompt Engineering.

Frameworks & Tools: React, Angular, FastAPI, Streamlit, Tailwind CSS, Jest

Cloud & DevOps: AWS, Google Cloud, Kubernetes, Docker, Git

Projects

Imagine | [Next.js MongoDB Tailwind Stripe Clerk Cloudinary Vercel](#) | [Source Code](#)

- Built a scalable **SaaS platform** using **Next.js**, **MongoDB** and **Tailwind**, integrating **Cloudinary** for image processing, **Stripe** for payments, and **Clerk** for authentication, handling **2000+** daily image transformations with **99.9%** uptime.

Achievements

- Secured **2nd** spot in the LGBTQ+ community app/website category at the "**Hack the Mountain Hackathon**".
- Secured **3rd** spot in the **Clear** hackathon implementing seamless **Slack UI integrations**.
- Led technical workshops on **Google ADK** for **200+** engineers and partners (**TCS, Wipro, HCL**), increasing internal and partner adoption.

Certifications

AWS Cloud Technical Essentials

Web Development

Software Testing

Education

Chandigarh University

B.E., Computer Science Engineering

August 2020 – July 2024

CGPA: 7.94
